Features

- Event registration
    - Google Form – v1
    - **In-house solution (payment gateway)** – v1/v2
        - For forms, we need a custom module for creating different forms since each form will be entirely different
        - https://github.com/dobtco/formbuilder - not maintained + is this really how we want to handle this?
        - SQL vs NoSQL
    - Barcode scanning for registered user at venue – v3
- Event creation – v1
    - capacity, dates, location, etc.
- Social media plugs – v1
- **FEED** – BookMyShow type
    - Filtering based on dept., topic, date, inter-intra college – v1
    - Recommendation system – v3

To-Do

- Decide schema, create models
- Setup workflow – from coding to test deployment
- More ideas & features
